

## **Urban Forestry Today Webcast—TODAY!**

### **Urban Wood Utilization: Options and Alternatives**

Tuesday, December 13, 2016 | 12:00 – 1:00 p.m. (ET)

Join Sean Mahoney, Wood Utilization Forester, Massachusetts Department of Conservation and Recreation as he outlines the options and practices communities and professionals may consider when it comes to capitalizing on their urban wood resources.

To attend this session, go to [www.joinwebinar.com](http://www.joinwebinar.com) and enter the ID code **167-428-923**.

This broadcast is free and will offer the opportunity for arborists to earn 1.0 ISA CEU and 0.5 MCA credit. For those who are unavailable to attend the live broadcast, archived sessions will be available in the 'videos' section at [www.urbanforestrytoday.org](http://www.urbanforestrytoday.org).

For more information, contact: Rick Harper, Department of Environmental Conservation, University of Massachusetts, Amherst [rharp@eco.umass.edu](mailto:rharp@eco.umass.edu)

*The Urban Forestry Today 2016 Webcast Series is sponsored by the University of Massachusetts Department of Environmental Conservation, in cooperation with the USDA Forest Service, Massachusetts Department of Conservation and Recreation, University of Massachusetts Extension, and Massachusetts Tree Wardens' & Foresters' Association.*

## **Urban Forest Connections Webinar**

### **Climate Change & Urban**

### **Environments: Adaptation through diversity**

Wednesday, December 14, 2016 | 1:00 - 2:15 p.m. (ET)

This webinar will highlight two compelling projects that seek to sustain the benefits of urban and community forests in the face of climate change.

**Leslie Brandt** will present the Urban Forestry Climate Change Response Framework, which engages communities in a three-step process that includes regional vulnerability assessment and local on-the-ground action. The Nebraska Forest Service has partnered with the Kansas Forest Service on an initiative called Environmentally Adapted Trees.

**Justin Evertson** will explain how this initiative works with nursery professionals, arborists, foresters, and outreach specialists to identify, prove the suitability of, and encourage the growing and planting of underutilized tree species in the region.

**This webinar is open to all.** This webinar is eligible for 1.0 CEU with the International Society of Arboriculture. Check the Urban Forest Connections [website](#) for updates and to watch recordings of previous webinars.

For connection information, go to <http://www.fs.fed.us/research/urban-webinars/>.

## **i-Tree Q&A Roundtable with the i-Tree Development Team**

Thursday, December 15, 2016 | 1:00 - 2:00 p.m. (ET)

Join the i-Tree Development team in an informal discussion about the i-Tree suite. Learn about some of the exciting advances in the i-Tree suite and have your questions about i-Tree answered by the very people who bring you i-Tree, including Dr. David Nowak and others.

i-Tree is a state-of-the-art, peer-reviewed software suite from the USDA Forest Service that provides urban forestry analysis and benefits assessment tools. The i-Tree tools help communities of all sizes to strengthen their urban forest management and advocacy efforts by quantifying the structure of community trees and the environmental services that trees provide.

For more information and to pre-register (required), go to: <http://www.unri.org/webcasts/>.

*\*Note the new date of December 15. Previously, this webcast was scheduled for Dec. 21.*

# Preparing Urban Forests in the Boston Region for Climate Change

January 24-25, 2017 | Cambridge, MA

Urban and community forestry professionals face the tremendous challenge of developing and implementing management actions that help urban forests respond to climate change. A workshop on January 24 will:

- Provide information on the current and anticipated effects of climate change on the Boston region and its urban forests and natural areas
- Describe resources and tools that can be used to integrate climate change into urban forest management
- Outline adaptation concepts and strategies in the context of sustainable forest management
- Highlight real-world examples of adaptation projects

An active, hands-on training will be held for a limited number of participants on January 25 where urban forestry professionals and planners will incorporate climate change considerations and identify actions for adaptation into their own real-world projects.

To find out more and to register, go to: <http://forestadaptation.org/Boston-FAPP>

*This session is being organized by the Northern Institute of Applied Climate Science, US Forest Service, USDA Northeast Climate Hub, USDA Northern Forests Climate Hub, The Trust for Public Land, City of Cambridge, MIT Office of Sustainability, Massachusetts DCR, and the Metropolitan Area Planning Council.*
